Composite Wood Deluxe Decking

Composite Wood Deluxe Decking is using the latest technology Co-extrusion.

New material capped outside, the shell is made of a high performance and moisture-resistant polymer which is anti-scratches and easy to clean as well as keeps the inside WPC from water absorption.

The shield and core are extruded simultaneously, so there are no adhesives or chemicals that are harmful to the environment.

Natural surface and stable quality make the second generation Co-extrusion Decking become more and more popular in the yard.

Composite Wood Classic Decking

Composite Wood Classic Decking

Composite wood classic decking is composed of natural wood powder, plastic and additives in a certain proportion.

It is a 100% eco-friendly product with many advantages: waterproof, anti-corrosion, moisture-proof, anti-UV, anti-scratch, anti-pressure etc, so WPC Decking has much longer service life than real wood decking.

Composite wood classic decking only need Low-cost maintenance, it not only has natural wood texture and wood grain, but also can be customized with different colors according to your own preference.

Because of good quality and beautiful appearance, Composite wood classic decking is widely used densely-populated areas, such as parks, pools, seaside resorts, waterfront pavements, home, outdoor facilities, etc.

Outdoor Cladding

Outdoor Cladding, is a decoration for the exterior of a building to beautify and protect it.

Wood plastic outdoor cladding are more attractive than traditional exterior walls due to their eco-friendly properties and aesthetic appearance.

Our outdoor WPC cladding are made from recycled plastic and wood fibres in various colours and are waterproof, moisture and insect resistant.

Outdoor Cladding will not rot or warp, so maintenance costs are very low.
